S/S-Tech is an unprecedented international opportunity to advance the body of knowledge in the technology of solidification/stabilization.

Host City Sydney, Nova Scotia, Canada is set to welcome over 200 delegates to this major event, where they will enjoy two days of peer-reviewed technical

papers from experts in the field of S/S, and a third day of presentations by the Sydney Tar Ponds Project team and a site tour of the largest S/S project in Canada.
