

Workshop WASCON 2006, Wednesday 31 May, 15:30-18:00

**LEACHING TESTS FOR ORGANIC CONTAMINANTS**  
**State of development and application for risk assessment of soil and groundwater contamination**

*Convenors: Rob Comans & Jette Bjerre Hansen*

**Programme**

*15:30 - 15:50 Jette Bjerre Hansen (DHI) and Rob Comans (ECN)*

Introduction to the need for leaching tests for non-volatile organic contaminants and current state of development

*15:50 - 16:10 Margareta Wahlstrom (VTT)*

Regulatory drivers for implementing leaching tests for organic contaminants

*Key-note lecture:*

*16:10 - 16:40 Peter Grathwohl (Univ. of Tübingen)*

Use of leaching tests for impact assessment of contaminants in soil and groundwater (GRACOS, Sickerwasser Prognose)

16:40 - 16:55 Coffee break

*16:55 - 17:15 Gerlinde Roskam (ECN)*

Role of DOC in leaching processes of PAHs in soil and waste materials

*17:15 - 17:35 David Kosson (Vanderbilt Univ.)*

Leaching of PAHs and other organics - mechanisms, rates and challenges for developing practical test methods

*17:35 - 18:00 All*

Discussion & summary

(Joint review paper for Waste Management?)
